Leading publisher in science, technology, medicine

2200

230,000

8,000

The two routes to Open Access (OA)

Green Open Access

- Deposit of author's accepted manuscript version in a repository.
- Individual self-archiving policies by publisher/journal.
- Embargo periods may apply.

Gold Open Access

- Fully OA journals and Hybrid OA option for subscription-based journals.
- OA content is freely available for anyone at anytime in exchange of a publication charge.
- Gold OA removes permission barriers (most copyright and license restrictions).

Springer's Open Access Policy

- Focus on growing (full) gold open access
- Facilitate the customer's needs by:
 - Allowing green, but with strict enforcement of our terms
 - Springer Open Choice (hybrid)
 - A full suite of full open access journals branded BioMed Central, Springer Open and Springer Plus
- Be involved and engaged in open access discussions

Open Access flavors at Springer

Authors' Rights

- Self-archiving of author's accepted manuscript version
- Upload service for NIH funded authors

Hybrid Open Access

Fully Open Access

Springer self-archiving policy for journal authors (Green OA)

Deposit of authors accepted manuscript version (AAM):

- Author's own website: no embargo/immediately
- Any repository: 12 months embargo

- We deposit in PMC on behalf of the author
- All this is paid for in the subscription fee

Springer is a green publisher

Springer Open Choice uptake affects 2011 journal pricing

Springer has analyzed the uptake of its open access option Open Choice for articles published in 2009 and is pleased to share its impact on 2011 pricing.

Springer Open Choice allows authors to publish their article with open access in exchange for payment of a fee, for the majority of its journals. The articles are then immediately freely available and the copyright remains with the author, and articles are published under the Creative Commons Attribution Non-Commercial License. These articles can be self-archived with immediate access.

Open Access flavors at Springer

Authors' Rights

- Self-archiving of author's accepted manuscript version
- Upload service for NIH funded authors

Hybrid Open Access

- Open Access option in majority of Springer subscription titles
- Open Choice for individual authors:
Article fee
€ 2200/ US\$ 3000

Fully Open Access

Overview of open access

Changing landscape of open access publishing

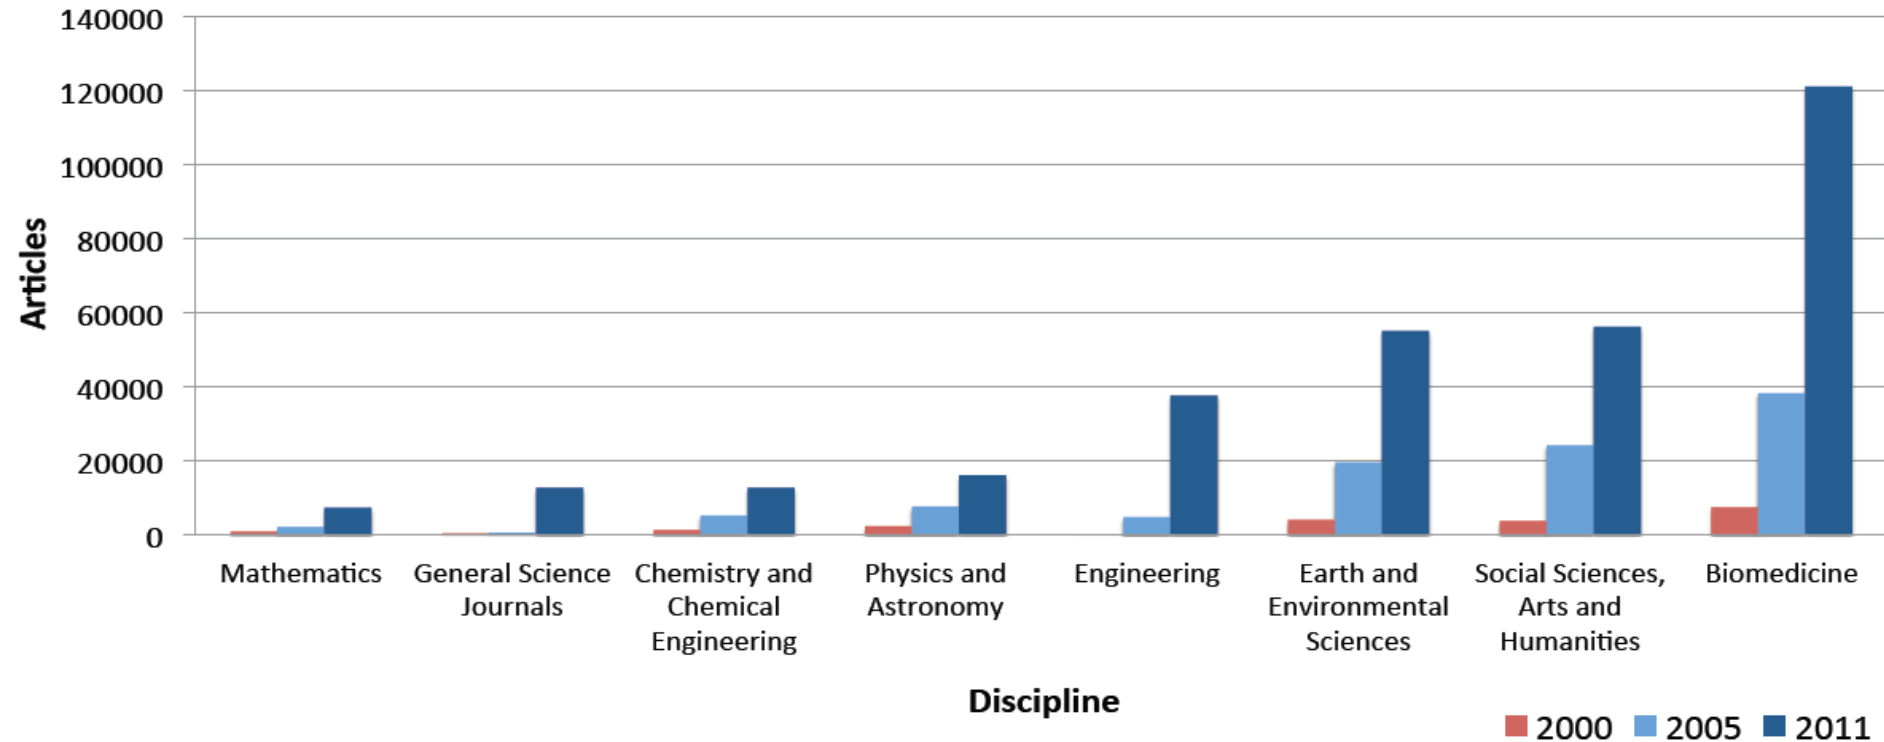

2000

2013

Market-Growth in Gold Open Access articles

Source: Anatomy of open access publishing: a study of longitudinal development and internal structure, Mikael Laakso and Bo-Christer Björk

BMC Medicine, 2012, 10: 124

Default OA copyright and license terms

- Copyright remains with the author(s)
- Articles are published under the **Creative Commons Attribution (CC BY)** license:
 - Removes copyright and permission barriers
 - Facilitates distribution, free reuse and sharing **for commercial and non-commercial purposes** as long as the author and source is attributed
 - Enables self-archiving of the final published version (no embargo restrictions)

What is Gold Open Access at Springer

- Author retains copyright
- User rights under CC-BY 4.0 International Creative Commons Attribution license
- Deposit anywhere using SWORD protocol (for Springer Open Choice TBD)
- Deposit in Portico/CLOCKSS, KB (Dutch National Library) and CAS
- Altmetrics
- Indexing and Abstracting in all relevant services
- And all future services to be developed

Open Access and the Big Deal

- So far avoid double dipping by adjusting the list prices
- Since many deals do not use list prices Springer now takes the open choice articles completely out of the equation:
 - Traditional Big Deal is for subscription articles only
 - Full open access is outside the traditional Big Deal

Springer understands the budgetary issues for libraries, especially in countries with a strong uptake of gold open access and is willing to discuss this with the customers

OA publishing at Springer – our expertise

- More than 10 years of experience with publishing open access journals
- Over 450 fully open access journals

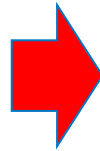

The financial side – SpringerOpen/BioMed Central journals

- Article publication charges (APCs)
 - SpringerOpen: 500 – 1,500 EUR
 - BioMed Central: average 1,370 EUR
 - Paid by the author (via research grant, library, institutional OA fund, ...)
 - Paid through Open Access Membership
- Waivers (economic hardship; Invitation waivers for EICs)
 - Open Access Africa: free Open Access Memberships for low income countries
- Journal sponsorship

SpringerOpen – now including books!

- SpringerOpen books launched in August 2012,
- Covering all scientific disciplines
- Accepts all types of books
- High-quality publishing standards as peer-review, copyediting etc apply
- License: Creative Commons Attribution Non-Commercial (CC BY-NC)
- Copyright remains with the editor(s)/author(s)
- Charge is calculated individually, based on the number of pages per book
- SpringerOpen books are covered by our SO/BMC OA Membership Program:
OA Member authors are entitled to a 15% loyalty discount

Article level metrics

- alternative to the impact factor, h-index
- Additional to citation counts it measures other aspects of impact like
 - Social media attention
 - Attention in news media
 - Downloads, article views

Springer sees this as a valuable additional metric.

Some funders require this additional metric to the IF

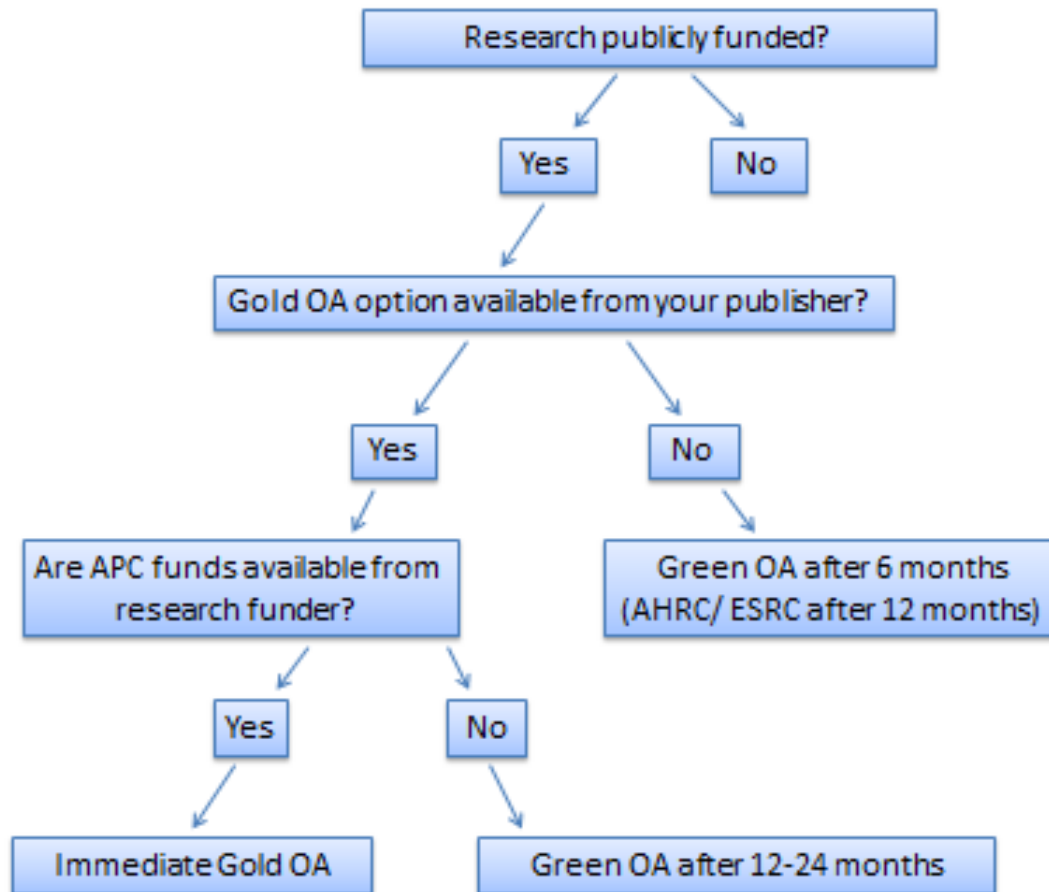

The UK example

The Finch recommendations: preference for gold open access

- Mixed economy for the foreseeable future
- Policy direction should be towards gold (APC driven) access
- Too short embargoes could harm the existing system unnecessarily
- Also underlying data should be easily accessible
- (Limited) money is made available to engage the process

- Since gold open access is just for the UK produced articles (6% of global output) further licensing opportunities need to be considered

The RCUK open access „decision tree“

Springer's Open Access Policy

- Focus on growing (full) gold open access
- Facilitate the customer's needs by:
 - Allowing green, but with strict enforcement of our terms
 - Springer Open Choice (hybrid)
 - A full suite of full open access journals branded BioMed Centrall, Springer Open and Springer Plus
- Be involved and engaged in open access discussions
