

The story of the mega journal

A quick bio

Started my career in consumer goods –
Holden, Kraft Foods, JnJ, English National
Lottery

2008, moved to Nature Publishing Group
Publishing Manager, Scientific Reports

2013, started at Elsevier
Publishing & Product Director, Heliyon

Open access:

*In general, open access stands for the **free and permanent access** to published research, combined with clear **guidelines** for readers to share and use the content.*

The mega journal:

‘Very, very large

Open access

***(Preferably) without any artificial
constraints on its ability to grow¹***

¹Pete Binfield, 31/10/14, <http://www.slideshare.net/ssprca/367-peter-binfield>

Springer Plus a SpringerOpen Journal

What do mega journals aim to deliver?

- A home for all research that is technically sound, without making objective decisions on novelty/impact
 - *Letting the community decide the merit of the work post-publication*
 - *No constraints on size – therefore everything sound can be published*
- Asking ‘should this be published?’ rather than ‘should this be published in this journal?’
- Broad coverage of subject areas – removing subject-led scope constraints
- Rapid (but still rigorous!) peer review
- Fast publication post review
- Web-based platforms for publication
 - *Mega journals are online-only!*

Key features – editorial scope

- All articles reporting sound science are suitable for publication, regardless of subject area/scope
 - Papers are assessed on merit, rather than novelty or impact
 - Editors and reviewers are asked to ask objective questions on how well done the work is
 - Most importantly, all research must be...
 - Technically and ETHICALLY correct, meaning...

Key features – editorial scope*

- Originality
 - The study reports original research and conclusions
- Data
 - All data to support the conclusions have been either provided or are otherwise publically available
- Statistics
 - All data have been analysed with the appropriate statistical tests and these are defined clearly
- Methods
 - The methods are described in sufficient detail to be replicated
- Citations
 - Previous work has been appropriately acknowledged
- Interpretation
 - The conclusions are a reasonable extension of the results

Source: Heliyon.com

Other mega journals will have variations on these criteria!

Key features – publishing process

- A focus on rapid publication via:
 - Online only publication
 - Rapid turnaround from acceptance to publication online
 - (Depending on the journal) a rapid proofing process, or no proofing process at all
- Easy and transparent sharing
 - Creative commons licensing
 - Accessibility globally, without paywalls
 - Clear requirements for re-use

Key features – platform

- Article-driven web designs
- Bundling of content into subject areas to ensure articles are still discoverable
 - *Discoverability is key!*
- Use of metrics (Altmetric, Plum, PLOS metrics, amongst others) to enable readers to assess the content in multiple ways
- Indexing on most, if not all, traditional indexing sites – ISI, Scopus, PubMed Central
- Press coverage and social media focus to enable papers to stand out

How mega journals work with other titles – Article Transfer

- An article transfer option eliminates the need for authors to reformat and re-submit their papers
- Provides authors with an easy and fast path to publication in a quality journal
- If a transfer is not offered, authors may still submit to mega journals directly

An introduction to Heliyon

- Elsevier's open access mega journal
- Sound science journal: Papers are assessed on technical merit, rather than scope and impact
- Broad scope: All research is welcome (but only primary research articles)
- Gold open access journal – APC is \$1,250 (plus taxes)
- Opened for submissions March 2015, first publications September 2015

Heliyon

You're Invited to Publish Your Research in Heliyon

Heliyon is an open access journal from Elsevier
publishing quality research papers across all disciplines.

Heliyon's value proposition

- Editorial excellence: In-house editorial team and external editorial board of over 900 active researchers across all research disciplines
- Speedy publication:
 - 20 days submission to first editorial decision
 - 60 days submission to first decision after review
 - 130 days submission to publication
- High visibility
 - *Full-time marketing manager*
 - *User-friendly website*
 - *User data provided with every paper*

Published Papers - Highlights

- Investigation of how the season of birth may affect later life traits - [Heliyon 1 \(2015\) e00031](#)
- Presentation of a method to generate smart earthquake-resistant building systems - [Heliyon 2 \(2016\) e00069](#)
- Description how decaying pig carcasses may help forensic investigations - [Heliyon 2 \(2016\) e00070](#)
- Development a new material to be used in Li-ion batteries - [Heliyon 2 \(2016\) e00081](#)
- Announcement that a protein in sweet potato affects lipid metabolism and body weight - [Heliyon 2 \(2016\) e00201](#)
- Presentation evidence for the existence of a bird species thought to be extinct - [Heliyon 3 \(2017\) e00230](#)
- Suggestion that based on a theoretical model it may be possible to redistribute the energy contained in tsunamis using acoustic–gravity waves - [Heliyon 3 \(2017\) e00234](#)

So why mega journals?

- A different model of publishing
- Fuss free – no worries about scope or subject matter, because every subject area is accepted
- Taking the subjectivity out of peer review
- Supporting individuals who want to publish quickly
- Supporting individuals who wish to publish open access
- *Offering authors choice over how and where to publish!*

Niche?

OR

Mega journal?

THEN...

Which one?

**Ultimately, it's
all about
author choice!**
